

Meeting Notes

ASHRAE TC9.9 Building Commissioning Research Subcommittee

January 1998, San Francisco Marriot Hotel

Meeting Attendees: Dave Branson, Harvey Brickman, James Gartner, Kristin Heinemeier, Eli Howard, Jerry Kettler, Tim O'Connor, Mary Ann Piette, Kathie Radke, Dave Shipley

The research subcommittee reviewed and discussed a full list of research topics and worked to bring them forward as Research Plans or Work Statements. We chose and prioritized five of the items for submission to RAC for review.

1. "Identification and preservation of building design and commissioning information", co-sponsored with TC1.5 (their lead)
2. "The building automation system's role in commissioning of HVAC systems", co-sponsored with TC1.4 (our lead)
3. "Identification of ideal monitoring data points for commissioning support during HVAC design", co-sponsored with TC1.4 and TC4.6 (our lead)
4. "The impact of commissioning HVAC systems on life cycle costs", co-sponsored with TC1.8 and TC1.7 (our lead)
5. "Diagnostic tools for maintenance, operating and commissioning cost optimization", co-sponsored with TC1.8 (lead?)

The prioritized list of research project topics and the full list of topics for TC9.9 are both attached along with the Research Plans and Work Statements in their most recent form.
